SUMMARY

Senior QA Engineer with 5+ years of experience delivering end-to-end Software Quality Assurance across Web, Mobile (iOS & Android), API, and enterprise systems in banking, fin-tech and multi-product environments.

Specialized in building automation frameworks from scratch using Selenium, Cypress, Playwright, Katalon, and Postman, reducing regression cycles by up to 60% and significantly improving release reliability.

Strong expertise in test strategy, risk-based testing, API validation, and CI/CD integration within Agile/Scrum environments. Proven ability to lead QA initiatives, mentor engineers, and act as a bridge between engineering and product teams to deliver high-quality, production-ready systems.

KEY IMPACT & ACHIEVEMENTS

- Reduced regression cycle time from 3 to 5 days down to under 1 day by building automation frameworks across multiple companies
- Built and scaled 300+ automated test cases across API, Web, and Mobile platforms
- Improved defect detection rate by approximately 40%, minimizing production bug leakage
- Owned full QA lifecycle as sole QA engineer for multi-region system (Indonesia, Thailand, Singapore)
- Identified and prevented 200+ critical defects before production release
- Mentored QA engineers and established standardized QA processes across teams

EXPERIENCE

Senior QA Engineer

Noovoleum – Jakarta, Indonesia | Dec 2025 – Present

- Owned end-to-end QA lifecycle for a multi-region application (Indonesia, Thailand, Singapore) across Web, API, and Mobile platforms
- Improved release quality and cross-region consistency by executing comprehensive testing strategies across Dev, QA, Staging, and Production environments
- Built automation test suites from scratch (API, Web, Mobile), scaling to 300+ test cases and significantly reducing manual regression effort
- Led API testing initiatives using Postman and Apidog, including mock data setup and multi-environment validation
- Improved defect resolution speed by documenting high-quality bug reports with clear reproduction steps and environment context
- Acted as primary QA point of contact between developers and stakeholders to ensure release readiness

Lead QA Engineer

PT Ikonsultan Inovatama – Jakarta, Indonesia | Jul 2024 – Nov 2025

- Led QA efforts across multiple projects, aligning test strategies with business requirements and product goals
- Mentored junior QA engineers, improving test case quality and establishing structured QA standards
- Improved regression efficiency by implementing automation using Katalon Studio, reducing testing time by approximately 60%
- Designed and executed end-to-end test scenarios covering functional, integration, regression, and performance testing
- Contributed to Agile/Scrum processes and improved QA workflows for faster and more reliable releases

QA Engineer

PT Moonlay Technology – Jakarta, Indonesia | Mar 2023 – Jun 2024

- Ensured quality across 5+ concurrent enterprise projects, including banking APIs and mobile applications
- Increased automation coverage to approximately 70% by developing and maintaining test scripts using Selenium and Katalon
- Identified and prevented 50+ critical defects pre-release, improving system stability
- Collaborated with cross-functional teams to define edge cases and improve test coverage
- Established structured QA documentation practices adopted across the team

QA Engineer

PT Qoin Digital Indonesia – Jakarta, Indonesia | Feb 2022 – Mar 2023

- Improved product reliability for e-wallet applications by reducing post-release defects by approximately 30%
- Built automation test suites covering 150+ scenarios using Selenium and Katalon
- Performed API testing across 20+ endpoints, ensuring transaction accuracy and system stability
- Enhanced bug tracking clarity, accelerating issue resolution across teams

QA Engineer

PT Avows Technology – Jakarta, Indonesia | Jun 2021 – Feb 2022

- Delivered manual testing for financial product systems (Pegadaian), ensuring stable product releases
- Collaborated directly with client-side teams to align testing with business requirements
- Maintained detailed testing and documentation processes for system validation

Desktop Support Engineer

PT Berca Hardaya Perkasa – Jakarta, Indonesia | Jan 2021 – Jun 2021

- Maintained 95%+ issue resolution rate by diagnosing and resolving technical issues efficiently
- Supported IT infrastructure including hardware, networking, and system setup

QA Manual Engineer

PT Whiteopen Teknologi – Jakarta, Indonesia | Jan 2020 – Dec 2020

- Executed manual testing and created structured test documentation for enterprise applications
- Collaborated within cross-functional teams to ensure system quality and stability

TECHNICAL SKILLS

Core QA Expertise: Test Strategy & Planning, Risk-based Testing, Test Case Design & Execution, Regression, Functional, Integration, E2E Testing, Defect Analysis & Root Cause Analysis

Automation: Selenium, Cypress, Playwright, Katalon Studio

API Testing: REST API Testing, Postman, Newman, Apidog, API Automation & Validation

Performance Testing: JMeter, K6

Process & Tools: SDLC / STLC, Agile / Scrum, CI/CD (Jenkins, Git-based workflows), Git, GitHub, JIRA

Programming: Java, JavaScript, Python

Platforms: Web, iOS & Android, Desktop, Flutter Applications

EDUCATION

Bachelor of Informatics Engineering (In Progress)

Universitas Pelita Bangsa – Bekasi, Indonesia | 2024 – Present

CERTIFICATIONS & TRAINING

- QA Bootcamp, Software Quality Assurance
- Selenium Automation Testing
- Cypress End-to-End Testing
- JMeter Performance Testing
- Postman API Testing
- Katalon Studio Automation
